

Award-winning glass protection.

About ClearShield®

For more than 40 years, Ritec International Limited in the U.K. has been the pioneer and market leader for “non-stick,” easy-clean glass. Its award-winning **ClearShield®** Glass Protection technology is a liquid solution for glass surface renovation, protection and maintenance that can upgrade virtually any glass product.

Glass processors and fabricators across the globe enjoy the benefits of **ClearShield®** Glass Protection in a wide range of applications. By partnering with Vitro, **ClearShield®** will become available for glass products used in a wider range of growing markets, including architectural, solar, decorative, shower, marine and residential glass.

PRODUCT BENEFITS

- **ClearShield®** can be applied in any factory as well as to glass that has already been installed to ensure its clarity, visibility and cleanliness over time.
- Existing glass that has been stained and discolored can be brought back to an ‘as-new’ appearance through the technology’s unique renovation process.
- **ClearShield®** is independently proven to resist bacterial adhesion, which can be invaluable to hospital projects, such as operating rooms.
